[Nomination and Award Comments]

I am delighted to have the opportunity to screen our film alongside the works of prominent international artists at this wonderful event, and to report back to the people involved in this work! It reminded me of the feeling I get when I accomplish something and the importance of cooperation with the creators. I believe that this result will be a source of great pride for the friends I worked with on this project. I also felt very happy that our work was recognized abroad. I hope that the news of this selection will lead to even more people and that this music video will be of interest to everyone overseas. We are also excited about the feedback we received in Berlin!
