

About ROHM

ROHM, a leading semiconductor and electronic component manufacturer, was established in 1958. From the automotive and industrial equipment markets to the consumer and communication sectors, ROHM supplies ICs, discretes, and electronic components featuring superior quality and reliability through a global sales and development network.

Our strengths in the analog and power markets allow us to propose optimized solutions for entire systems that include peripheral components (i.e., transistors, diodes, resistors), power devices such as SiC and GaN, and drive ICs that maximize their performance. For more information, please visit ROHM's website: <https://www.rohm.com>
