

GOLDWIN's target-setting toward improving the environment:

Promoting green design: Increasing the percentage of products using environment load-reducing materials to 90% or more by 2030 and 100% by 2050.

Realizing a decarbonized society: GOLDWIN aims to achieve carbon neutrality in all its offices and directly managed stores by 2030 and in its supply chain by 2050.

Realizing a recycling-oriented society: Seeking to realize a recycling-oriented society by reducing disposals of products and materials to zero by 2030 and slashing such disposals including in its supply chains to zero by 2050.
