### **Evixar Inc.**

Established in 2004, Evixar developed the automatic content recognition technology Evixar ACR and acoustic communication technology Another Track(R) ahead of other companies in 2008, in anticipation of a surge in digital streaming content. These technologies are currently being applied to fields such as television, radio, movies, theatrical performances, sports, live entertainment, and disaster prevention. In 2017, Evixar won the Tokyo Venture Technology Excellence Award. We aim to establish “barrier-free screening using the smartphone app HELLO! MOVIE” and “subtitled spectacles” as industry standards in the world of movies.
