

2. "Collaborative Service with China-Europe and China Domestic Railways"

[Service description]

A BCP solution designed to cope with the temporary suspension/reduction of flights from China and the restrictions imposed on domestic trucking within China, this service offers transport that links up cross-border rail transport service between China and Europe with domestic rail transport between East China and Xian.

[Service features]

- Shanghai will serve as the collection/delivery point for Jiangsu Province and parts of Zhejiang Province, and Ningbo as the collection/delivery point for the rest of Zhejiang Province.
- Domestic railway links will be used to transport cargo from Shanghai Station/Ningbo Station to Xian Station.
- The lead time will be approximately 5 days from Shanghai/Ningbo Station to Xian Station, 2 days for import/export handling, and 16 days between Xian Station and Duisburg Station (Germany).
- Rail transport ensures greater punctuality.
- Maritime transport links can be used for traffic to/from Japan.
