

NEWS RELEASE

[Facility features]

- Capable of maintaining three temperature ranges: 15-25°C (room-temperature), 2-8°C (refrigerated) and -15°C or lower (frozen)
- Completely outfitted with dock shelters to prevent temperature excursions and contamination by foreign materials
- System set to send out an alert immediately in the event of an excursion from the prescribed temperature range
- Outfitted with emergency-use generators for use during power outages
- Equipped with access control system for managing egress/ingress and CCTV cameras for round-the-clock monitoring

Nippon Express will continue enhancing its services to meet increasingly sophisticated and diverse pharmaceutical transport needs and will step up its efforts on behalf of the pharmaceutical industry, positioned as a priority industry in the Nippon Express Group Corporate Strategy.
