

NEWS RELEASE

【Details】

- CFS

Overseas forwarding locations will be configured via our network.

- The Company will establish GDP-certified facilities as well as operations that offer consistent quality end-to-end, from shipping to arrival.
- Quality assurance teams will be deployed locally to develop quality control systems globally in collaboration with the Head Office's Pharmaceutical Logistics Quality Assurance Office.

- Logistics network expansion through M&A

US companies with a solid reputation for providing logistics services to the pharmaceutical industry have been added to the Nippon Express Group as subsidiaries in order to extend the Group's global pharmaceuticals supply network across the US.

To maintain dynamic growth, future consideration will be given to rapidly expanding the Group's logistics networks within Europe and Asia as well.
